

User Interface Diagram for Mentor Caring System

B09

March 20, 2026

1 Introduction

This document presents the user interface (UI) design for the Mentor Caring System. It is prepared as a supporting document to be read together with the state transition diagrams in Section 3 of the Software Requirements Specification (SRS).

Each UI in this document corresponds to a state in the state transition diagram. Therefore, the number and label of each UI page must exactly match the number and label of the corresponding state.

2 UI Diagram Overview

Figure 1 shows the overall UI diagram currently designed for the system.

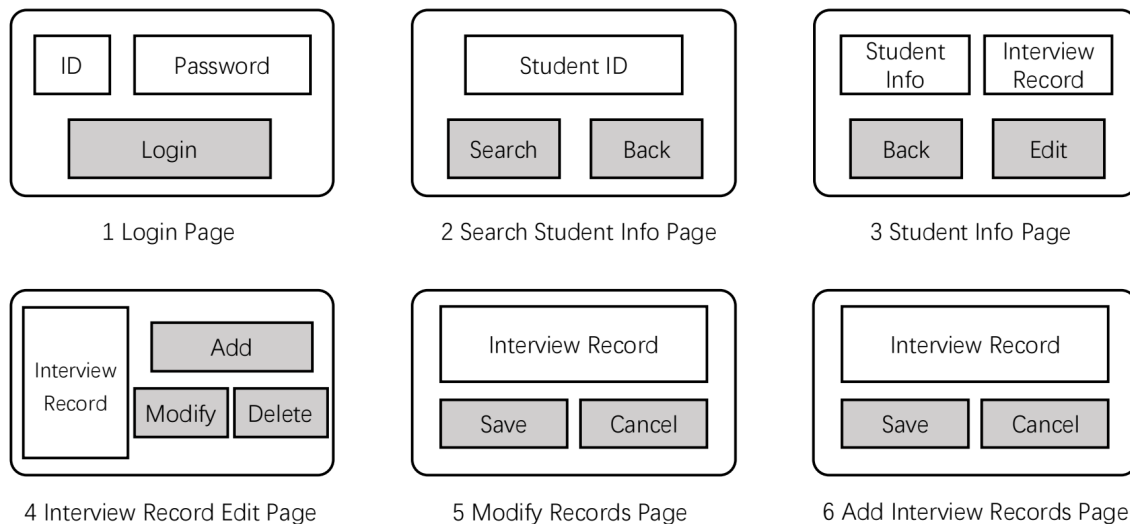

Figure 1: UI Diagram for Mentor Caring System

3 Overall Flow Description

The system starts from the login page. After a successful login, the user may search for student information by entering a student ID. When the student is found, the system

displays the student information and the related interview record. If the logged-in user has editing permission, the user may continue to the interview record editing page to add, modify, or delete interview records.

In addition to the student information flow, the system also provides a mentor search function. The user may search mentor information and then view the related member list. From the member list, the user may further open an individual student record page to review detailed student information.

4 UI Descriptions

4.1 1 Login Page

Purpose: This page allows the user to log into the Mentor Caring System using an existing account.

Main interface elements:

- ID input box
- Password input box
- Login button

User actions and transitions:

- The user enters an ID and password.
- The user clicks the **Login** button to submit the login request.
- If the login is successful, the system moves to the next available function page according to the user's role and permission.
- If the login fails, the system remains on the same page and displays an error message.

Remarks: This page is the entry point of the system.

4.2 2 Search Student Info Page

Purpose: This page allows the user to search for a student's information by entering a student ID.

Main interface elements:

- Student ID input box
- Search button
- Back button

User actions and transitions:

- The user enters a student ID in the input box.
- The user clicks the **Search** button to search for the student's record.
- If the student record is found, the system moves to **3 Student Info Page**.
- The user may click the **Back** button to return to the previous page.
- If the input is invalid or no matching record is found, the system displays an error message and remains on the same page.

Remarks: This page is the entry page for retrieving student-related information.

4.3 3 Student Info Page

Purpose: This page displays the selected student's information and the related interview record after a successful search.

Main interface elements:

- Student Info display area
- Interview Record display area
- Back button
- Edit button

User actions and transitions:

- The page displays the student's basic information in the **Student Info** area.
- The page displays the related interview information in the **Interview Record** area.
- The user may click the **Back** button to return to **2 Search Student Info Page**.
- If the user has the required permission, the user may click the **Edit** button to move to **4 Interview Record Edit Page**.
- If the user does not have editing permission, the page is displayed in read-only mode.

Remarks: This page serves as the main result page for student information retrieval.

4.4 3a Mentor Search Page

Purpose: This page allows the user to search for mentor information by entering mentor-related information.

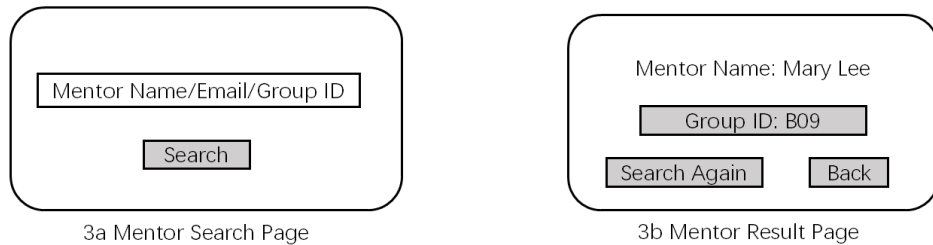

Figure 2: UI of 3a Mentor Search Page and 3b Mentor Result Page

Main interface elements:

- Mentor Name/Email/Group ID input box
- Search button

User actions and transitions:

- The user enters mentor name, mentor email, or group ID in the input box.
- The user clicks the **Search** button to submit the query.
- If a matching mentor record is found, the system moves to **3b Mentor Result Page**.
- If no matching result is found, the system displays an error message and remains on the same page.

Remarks: This page is the entry page of the mentor information search function.

4.5 3b Mentor Result Page

Purpose: This page displays the retrieved mentor information after a successful search.

Main interface elements:

- Mentor name display area
- Group ID display area

- Search Again button
- Back button

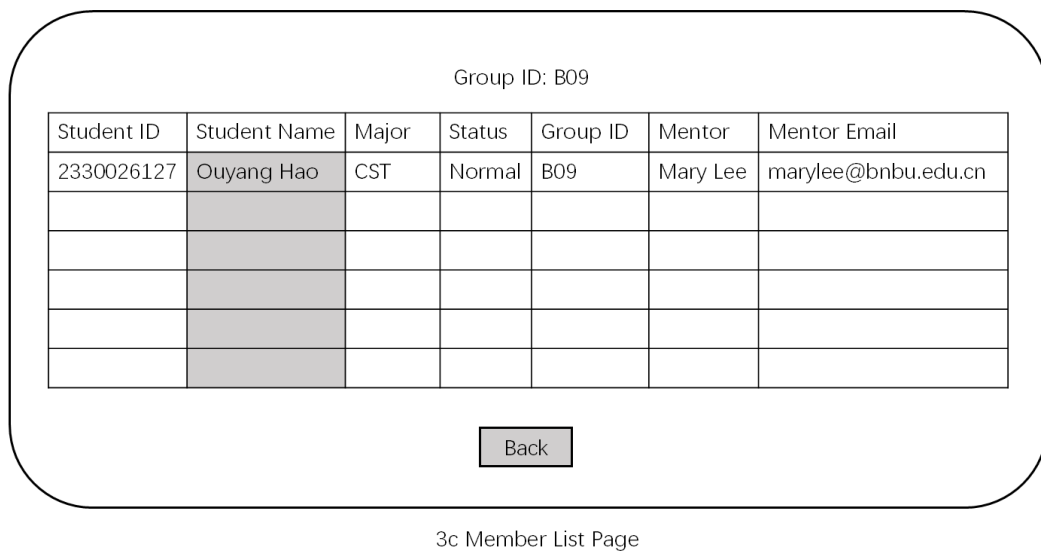

User actions and transitions:

- The page displays the mentor name and the related group ID.
- The user may click the displayed **Group ID** to move to **3c Member List Page**.
- The user may click the **Search Again** button to return to **3a Mentor Search Page**.
- The user may click the **Back** button to return to the previous page.

Remarks: This page acts as the result page of the mentor search process.

4.6 3c Member List Page

Purpose: This page displays the list of students belonging to the selected mentor group.

The image shows a user interface for the '3c Member List Page'. It is enclosed in a rounded rectangle. At the top center, it says 'Group ID: B09'. Below this is a table with 7 columns: Student ID, Student Name, Major, Status, Group ID, Mentor, and Mentor Email. The first row contains the data: 2330026127, Ouyang Hao, CST, Normal, B09, Mary Lee, and marylee@bnu.edu.cn. The next four rows have the first two columns shaded grey, while the others are empty. Below the table is a 'Back' button. At the bottom center, the text '3c Member List Page' is displayed.

Student ID	Student Name	Major	Status	Group ID	Mentor	Mentor Email
2330026127	Ouyang Hao	CST	Normal	B09	Mary Lee	marylee@bnu.edu.cn

Back

3c Member List Page

Figure 3: UI of 3c Member List Page

Main interface elements:

- Group ID display area
- Student list table
- Back button

User actions and transitions:

- The page displays the selected group ID and a table of related student records.
- Each row may contain student information such as Student ID, Student Name, Major, Status, Group ID, Mentor, and Mentor Email.
- The user may click a student's name or selected record to move to **3d Student Record Page**.
- The user may click the **Back** button to return to **3b Mentor Result Page**.

Remarks: This page provides an overview of all students in the selected mentor group.

4.7 3d Student Record Page

Purpose: This page displays the detailed record of a selected student.

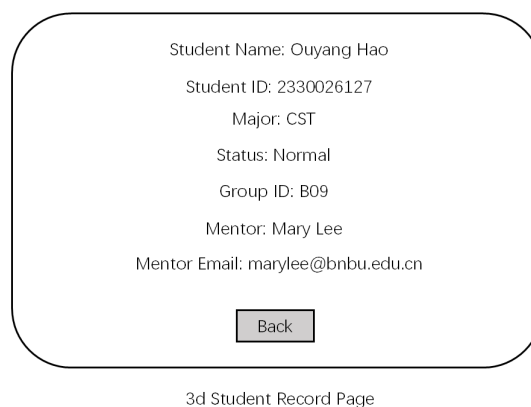

Figure 4: UI of 3d Student Record Page

Main interface elements:

- Student information display area
- Back button

User actions and transitions:

- The page displays the detailed information of the selected student, such as Student Name, Student ID, Major, Status, Group ID, Mentor, and Mentor Email.
- The user may click the **Back** button to return to **3c Member List Page**.

Remarks: This page is used to display the complete student record selected from the member list.

4.8 4 Interview Record Edit Page

Purpose: This page allows the mentor to manage interview records by selecting an editing operation.

Main interface elements:

- Interview Record panel
- Add button
- Modify button
- Delete button

User actions and transitions:

- The mentor reviews the currently displayed interview record.
- The mentor clicks **Add** to create a new interview record and move to **6 Add Interview Records Page**.
- The mentor clicks **Modify** to edit an existing interview record and move to **5 Modify Records Page**.
- The mentor clicks **Delete** to remove an existing interview record.

Remarks: This page serves as the operation selection page for interview record maintenance.

4.9 5 Modify Records Page

Purpose: This page allows the mentor to modify the content of an existing interview record.

Main interface elements:

- Interview Record editable area
- Save button
- Cancel button

User actions and transitions:

- The mentor edits the content of the existing interview record.
- The mentor clicks **Save** to save the updated record and return to **4 Interview Record Edit Page**.
- The mentor clicks **Cancel** to discard the changes and return to **4 Interview Record Edit Page**.

Remarks: This page is specifically used for updating an existing interview record.

4.10 6 Add Interview Records Page

Purpose: This page allows the mentor to add a new interview record.

Main interface elements:

- Interview Record input area
- Save button
- Cancel button

User actions and transitions:

- The mentor enters a new interview record in the input area.
- The mentor clicks **Save** to store the new record and return to **4 Interview Record Edit Page**.
- The mentor clicks **Cancel** to discard the input and return to **4 Interview Record Edit Page**.
